The air filter C 41 001 KIT: Performance in two parts

The air filter C 41 1776, which exists of one part, is replaced by the two-piece C 41 001 KIT.

Why does the air filter now exists of two parts?

The air filter element can easily be separated from the cover due to the two parts. Also it is manufactured using the latest spiral wound technology.

What are the advantages?

- Saves resources and energy
- Reduces CO₂-emissions on disposal
- Lower weight (-2.3 kg)
- More compact design
- Increased water stability
- Improved filter performance
- Lower costs

10%
Cost
savings!

Replacement of the filter element – quite simply!

The filter element is removed from the cover using a simply to handle patented turning mechanism. That's all!
